

I believe every American has freedom of choice. I chose to exercise my right to subscribe to XM radio. The choice of news, music, variety, talk, sports, religion, weather, etc. was instrumental in making this decision. Now the ability to have real time local weather and traffic conditions makes my drive to and from Upstate New York to New York City easier than ever before.

I urge the Federal Communications Commission to reject the NAB's petition 04-160. I made a choice to walk away from am-fm radio stations because the programming being offered by in large was not worth much. XM radio on the other hand offers tremendous choice for every American who chooses this radio service. Lets hear what the voice of the American radio public wants.
